## **BEADLEJUICE DIFF-BUSTER**

### **PRODUCT DESCRIPTION:**

BEADLEJUICE DIFF-BUSTER is a blend of alpha and poly alpha olephin base oil stocks along with extreme pressure and high heat additives. It is easily applied at the rig site in concentrated or diluted form with conventional mixing equipment and performs in both diesel and synthetic base fluids. BEADLEJUICE DIFF-BUSTER can also be used to prepare a complete oil based drilling fluid as it contains a filtration control additive, a viscosifier, and a very effective emulsifier. BEADLEJUICE DIFF-BUSTER is stable to continuous temperatures up to 300°F +.

### **PROPERTIES, TYPICAL:**

Appearance	Dark Brown Liquid
Specific gravity, g/cc	1.02

### **ADVANTAGES:**

- Stable to over 300°F
- Helps to emulsify water into oil based fluids
- Compatible with common drilling fluid weighting agents
- Easy to apply liquid concentrate

### **TREATMENT RATE, TYPICAL:**

Concentration, %	10 – Concentrated pills
